### Global great re-set: How it is to be implemented in a simple, thoughtful and revealing presentation

The Catherine Austin Fitts presentation below is important and insightful. I will simplify it into a two-page outline summary in next week's report.

For now, the following is an outline of her video interview, which is well worth the time to watch.

She has an excellent grasp of where we are and where it seems we are headed.

We have heard about the World Economic Forum great re-set and their "Common Pass" vaccine passport. The vehicle used to accelerate this has been the coronavirus.

Yesterday, Dr. Anthony Fauci said, "Covid vaccines appear to be less effective against some new strains." He said that early data shows that the COVID-19 vaccines on the market may not be as effective in guarding against more contagious strains of the coronavirus.

## **From the beginning:**

### **Central bankers' system transformation challenges.**

For many decades, the dollar has been the reserve currency. The central bankers are trying to bring in a new system, but it is not ready to go yet.

We are in a period of great change and uncertainty where the central bankers are trying to keep the dollar system going, lengthen the dollar system and accelerate bringing in the new system—trying to bring in new system without anyone realizing it.

They are testing the new system, which will be a transactional system that is all digital, essentially ending currencies as we know them.

### **2:00 Essentially all the money on the planet—it is big, complicated and messy.**

The challenge: how to market a system that if people understood it, no one would want. How to do that? With a health care crisis.

### **2:30 How do you herd all the sheep into the slaughterhouse without them realizing and resisting?**

The perfect thing is invisible enemies:

- **War on terror.** Use fear and scare tactics. Get government to protect. This divides and conquers people.
- **COVID-19:** Invisible virus will stop people from gathering. Digitize with contract tracking. Extraordinary control by protecting you from the invisible virus.

Scare people and use fear. People will need government to protect against the invisible enemy.

Another way is to divide and conquer. The media plays a very big role. One important ploy is to turn men and women against each other. Black and white against each other.

Institute fear to get people to go along with things. The invisible virus allows you to do enormous control mechanisms to stop people from gathering, organizing and talking about what is going on.

Digitize it with contact tracing so you can control who is talking to who. You can literally listen to everything they are saying. You can institute an extraordinary amount of surveillance.

### **4:20 Don't want us to underestimate the ability of the leadership to introduce a pathogen that will kill people.**

Get people to buy into a solution before they see where it is ultimately going. It is no longer a transaction system but a control system. Every central bank will come out with a digital currency that gives them the ability to turn your money on and off—if you don't behave, that is.

### **5:00 Digital transhumanism—hooked up to the financial system physically**

Take an injection that institutes the equivalent of an operating system in my body. I would literally physically hook up to the financial system.

The lockdown to dramatically centralize economic and political control.

For example, you have 100 small businesses on Main Street in a community. You declare them non-essential and shut them down. Suddenly you have Amazon and Walmart and the big box stores come in and take away all the market shares.

Declare non-essential debt trap. Federal Reserve creates quantitative easing. Main Street pays 16 percent in interest which leads to individual hardship.

### **9:00 Covid-19 is the institution of control necessary to convert the planet from democratic process to technocracy**

We are watching a change in control at the engineering of new control systems.

20-year financial coup d'état in the works.

At the end of 1995, the decision was made to move many of the assets and much of the money out of the country. Steal all the money from the pension funds and the government and send across the world.

Rather than tell the people you've stolen the money, you need an excuse that will allow you to consolidate and change the fundamental system— a magic virus.

### **11:10 Technocracy—they are pushing us toward trans-humanism**

Make injections into a body the equivalent of an operating system. Update every few months due to new virus strains.

Hook everyone into the cloud. Digitally identify and transact business.

Centralize bank cryptos where a bank can shut you off if they don't like the way you are transacting or behaving.

### **12:00 China: social credit system; complete digital control system of people**

### **14:00 Transhuman technocracy goes hand in hand. 24/7 control system including mind control**

Try to keep people separate so they don't see the connection.

**16:00 Federal Reserve system before**

**17:10 Bill Gates' injection of operating system into our body and use of viruses in our body as an excuse to update it. To make it work for his backdoor daily.**

**18:00 Operation warp speed and Dr. Slaoui**

The expert to head up "operation warp speed" was an expert on injectable brain machine interface. In 2016 Dr. Moncef Slaoui discussed GSK's development of [bioelectronic medicine](#).

*Dr. Moncef Slaoui on Bioelectronics – 56 seconds - <https://youtu.be/4rCX2gDFn2k>*

*Pandemic preparedness - <https://youtu.be/bPD-pvc5SS4>*

**18:30 Microsoft, Amazon and Leidos have three major cloud contracts**

- The Department of Defense JEDI cloud contract with Microsoft
- Amazon essentially a CIA contractor and 17 U.S. agencies
- Leidos did a big contract with the Navy in late 2019

**19:35 Once everybody is hooked into those three cloud entities, you have the ability to radically engineer how cash flows work.**

You can literally shut down almost all small businesses and put everybody in a universal basic income (UBI), a control system, and run it all through the military clouds.

**20:00 Technology gives you the ability to institute a complete control system and further centralize economic and political control.**

**22:00 Technology gives a small group a lot of control.**

Develop bio-tech opportunity for people to live 150 years. Downsize the population, integrate robots and use them for everything.

**23:15 Mr. Global using technology to move to a system of robotics, software and artificial intelligence a few people can control many with far less headaches. Mr. Global is very afraid of the general population.**

There are 325 million people in the U.S. and lot of guns. The new administration will likely attempt to go after those.

**25:00 Why second amendment is so important if they attempt to bring in the guns.**

**26:10 Couldn't have stopped the Trump landslide without COVID-19.**

**27:00 Used massive voter fraud to get rid of Trump. Fraud used in a massive way.**

**28:55 We start looking at the riots. States, cities where the governor was Republican or Democrat.**

**29:20: Where were the U.S. riots located?**

We checked the Federal Reserve. There are 12 banks. One headquarters and 11 regional branches, with 37 locations. The riots happened in 34 of the cities near the 37 Federal Reserve locations.

Take data in the Minneapolis area where the riots were. Opportunity zone is a tax shelter mechanism to avoid capital gains. If you take your money into the opportunity zones, you avoid all capital gain taxes.

Thriving businesses owned by Blacks and Hispanics. We determine non-essential. Riots and fires. Hung on their debt. Lot easier to go in and buy all those buildings. Disaster capitalism. Bezos and other tech leaders could put their stock proceeds into these areas to avoid capital gains.

Smart grids around the Fed branches and for the building out of the crypto system.

**35:00 Mr. Global now implementing robotics. New tech to make an enormous difference.**

**35:50 Hook everyone into the crypto system by Mr. Global.**

You will need a database and software system. A satellite system is key.

Able to track and monitor humans and robots 24/7.

Resource management system.

Technocracy: a human is a natural resource and to be used as such.

Created a separate civilization. Not part of our civilization.

Planet runs by force.

Today's most powerful control the space weapons and sea lanes.

China and U.S. competition on who controls space controls the planet.

**41:00 Chinese have a social credit system.**

Tied financial system and abilities to travel into behavior. Most people under 24/7 surveillance.

Their financial incentives and financial powers depend on how well they behave. In a slave system there is no personal freedom.

Technocracy will drive us into a similar system. Misbehave and pay the consequences.

Allowed to move 10 miles from home. To fly. Pecking order to your freedoms. Access to resources. System to automate everything that much harder to share in the benefits of the system.

**43:00 They have a one-way mirror. They can see you, but you can't see them.**

Majority of people have been supporting and financing it unbeknown to themselves.

A committee that runs the world.

Building and financial system and the power to stop it. Bring transparency, where it is going and stop building it.

Begin the conversation of where this is going. We are going to have to build the economy.

Stop banking at JP Morgan and go to local banks and credit unions.

Choice is between a transhuman slavery system or the human system.

Good map of where the transhumanism system is being built.

Don't help the military build operation warp speed. Don't help tech guys figure out how to inject nano particles in your body and hook them up to the cloud. Don't help big pharma make injections that are poisoning young American children to death. Don't help big ag produce GMO foods that are poisoning young Americans to death.

Don't let government institute health crisis situations.
